

DEVO - Gasket compression rig

Product features:

- ✓ compact design
- ✓ pressing of normal segments and keystone possible with one device
- ✓ easy operation
- ✓ only compressed air connection required

DPR

The gasket installation on the segment can be done without any problems with the gasket compression rig. Due to adjustable positioning aids and the slender and concise design, the handling of the device is made much easier. The DPR is available with 3-sided compression or 4-sided compression.
